1 PROBLEM ONE

How well does your operating system work?

RhinOS works as intended. Up to this point, all of the test files that have been provided work as intended. The additional tests that I have conducted on it pass as well. For all 10 labs and 4 projects, all the mandatory requirements have been met as well as some additional stuff and challenges. Overall, the operating system does the job and will look to expand on it before the semester ends. Pleased with the light and dark mode switch, but definitely want to improve that too.
